## **Student Centric Participative, Experiential and Problem Solving Methodologies used for better learning**

The C.P. & Berar College has always been mindful of the fact that the simple chalk and blackboard method is insufficient in these days where students have to face a great deal of competition in the outside world. The institute has come up with a range of programs/campaigns/initiatives that have helped our students get an extra edge. The methodologies used were

### **1. Participative Methods**

These include seminars, webinars, workshops, etc. where students are able to be active instead of passive participants. Students are encouraged to ask questions during or after seminars or webinars. They are made part of the organising process where a campaign is concerned. For example, when inculcating the values of cleanliness, campaigns like cleaning statues of our social heroes was undertaken. This campaign was largely put together by students under the guidance of their coordinator. Another campaign, wherein students go around the city on their bicycles on Republic and Independence Days collecting discarded flags in an attempt to restore dignity to the tricolor, is also organised by the students under the guidance of their coordinator.

### **2. Problem Solving Methodologies**

Students often face practical problems when making their way ahead in their career. The institute makes sure students get support at such times. For instance, for their language ability, there is the Vocabulary Development Workshop. For help in writing resumes, there were two workshops held - one by the commerce department and one by the English Department - addressing both the technical and the language aspect of resumes. Apart from this, students are also given practical experience of screen tests taken for competitive exams.

### 3. Experiential Learning

The institute has also held a number of programs that give students a chance for practical experience, helping them keep the learning with them for much longer, perhaps even a lifetime. These kind of activities primarily include On the Job Training, Internships, Industrial Visits, Educational Tours, etc. Attempt is also made to bring out the creative side of students by holding poetry reading sessions of poems composed by them. Essay Competitions, Oratory Competitions, and Quiz Competitions also form part of this kind of learning. So do Cake Making and Rakhi Making workshops. The Rakhi Making Workshop is very popular, and was even held in the online mode during the pandemic lockdown. So do workshops on language learning. This is an area that is wide open to experimentation and the institute takes full advantage of it.

### 4. Experiential Learning

The institute has also held a number of programs that give students a chance for practical experience, helping them keep the learning with them for much longer, perhaps even a lifetime. These kind of activities primarily include On the Job Training, Internships, Industrial Visits, Educational Tours, etc. Attempt is also made to bring out the creative side of students by holding poetry reading sessions of poems composed by them. Essay Competitions, Oratory Competitions, and Quiz Competitions also form part of this kind of learning. So do Cake Making and Rakhi Making workshops. The Rakhi Making Workshop is very popular, and was even held in the online mode during the pandemic lockdown. So do workshops on language learning. This is an area that is wide open to experimentation and the institute takes full advantage of it.

--	--	--	--	--

The institute gives its students good exposure in a number of ways, all the time keeping in mind that the programs it holds for students find resonance in the syllabus prescribed. Roughly, areas covered are entrepreneurship, critical faculties required in an academic environment and on the job, language, value education and an awareness of our rich culture.
