Internal Quality Assurance Cell (IQAC)

The IQAC is one of the biggest examples of decentralisation of work. It is responsible for preparing and implementing a blueprint for the working of the institution every year and reviews its policies every five years after an assessment cycle, thus endeavoring to stay in tune with the times.

- It defines the short-term and long-term objectives of the institution.
- It creates a benchmark for quality-enhancement measures.
- It devises a work plan to achieve objectives.
- It monitors and coordinates the execution.

The IQAC functions with the belief that excellence and quality are not one-time goals but continuous processes. To this end, the IQAC meets on a regular basis. New programs, up gradation of infrastructure and increasing the effective functioning of all systems are some of the major concerns of the IQAC.
